

About Us

Since its inception in 2010, HUNTECH ENGEENIERS is engaged in manufacturing, supplying and exporting of Packaging Machinery. We have been manufacturing a qualitative range of products. Our packaging machines come under four broad categories Fully Automatic VFFS Pouch Filling Machines, Fully Automatic High Speed VFFS Multi Track Machine, Pouch-in-Pouch and Flow Wrap Machines. These machines cater to the need of various industries such as food processing, cosmetic, and soap & detergent packaging. To offer our clients with the products as per their specifications, we also provide customized solutions. Our entire range is appreciated for its unique features such as excellent performance, longer service life and reasonable prices. The repeated orders from our clients spread all over the world speak volumes about our utmost quality products.
